

Chosen website <https://www.1a.ee>

1. Code validity

<https://validator.w3.org/>

A code review revealed 29 errors, including one serious one—number 29. The rest are related to missing attributes when using meta. There are also informative errors involving the use of a backslash (/).

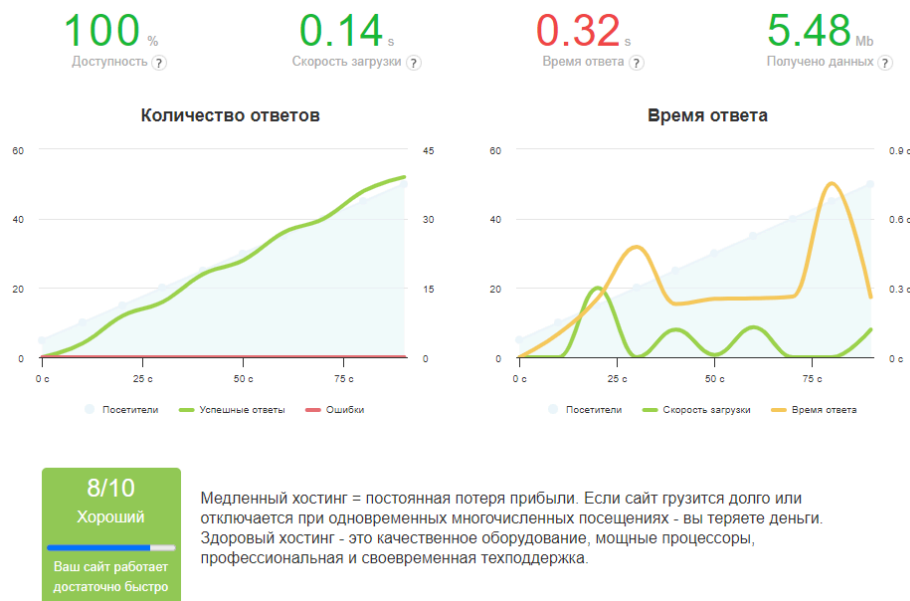

The screenshot shows five error messages from the W3C Validator:

- Warning 25:** The `charset` attribute on the `script` element is obsolete. From line 68, column 1; to line 68, column 148. The code snippet shows a `<script>` tag with `charset="utf-8"`.
- Warning 26:** The `type` attribute is unnecessary for JavaScript resources. From line 68, column 1; to line 68, column 148. The code snippet shows a `<script>` tag with `type="text/javascript"`.
- Error 27:** Stray end tag `head`. From line 69, column 1; to line 69, column 7. The code snippet shows a stray `</head>` tag.
- Error 28:** Start tag `body` seen but an element of the same type was already open. From line 70, column 1; to line 70, column 40. The code snippet shows a `<body>` tag opening inside another `<body>` tag.
- Fatal Error 29:** Cannot recover after last error. Any further errors will be ignored. From line 70, column 1; to line 70, column 40. This error occurs because of the previous structural error.

2. 1a.ee website availability and resiliency testing

<https://loaddy.com/>

Based on the data in the screenshot, we can see that the site is responsive, responding in less than a second. There are no hosting issues.

3. Speed test

https://pr-cy.ru/speed_test/

Based on the lists, a description of loading speed issues is provided. The site uses many images with extensions that require more network traffic (png, jpeg). It is recommended to use WebP and AVIF. Also, the images are not optimized to save bandwidth. Remove unused CSS and JS code.
